SWE 3409 · MOBILE APPLICATION DEVELOPMENT · INDIVIDUAL ASSIGNMENT 2

Declaration of originality

Document: evidence/MOB_A2_2528255_DECLARATION.pdf

Full name	Teta Erssie
Registration number	2528255
Verification code	MOB-A2-8255
Programme	BSc Software Engineering
Institution	INES-Ruhengeri
Course	SWE 3409 – Mobile Application Development
Work submitted	TetaPortfolio, a personal portfolio Android application
Date	12 October 2026

I, **Teta Erssie**, registration number **2528255**, declare that:

1. This assignment is submitted for SWE 3409 Individual Assignment 2. The application name is TetaPortfolio and the Android package is rw.ac.ines.ug2528255.tetaportfolio.
2. The portfolio text is my own: the biography, the seven skills, the education entries, and the descriptions of TetaPortfolio and MilkCheck in src/data/portfolio.ts. The identity in src/constants/student.ts is mine.
3. I did not copy another student's screens, wording, visual design or evidence. I understand that two submissions with substantially the same structure, wording and design may be reviewed for academic integrity.
4. I used Cursor as an AI coding assistant. What it was used for, and what I wrote myself, is stated in evidence/AI_USE.md. I remain responsible for the code and documents I submit.
5. The app does not store passwords, tokens or sensitive personal records. Editable profile text and a local photo reference stay on the device.
6. The test log separates checks confirmed in the source from checks that still have to be done on a physical phone. I will not mark a device test as passed unless I have run it.

Declared by: **Teta Erssie**

Registration number: **2528255**

Date: **12 October 2026**

Repository files this declaration covers

Required item	Where it is
README.md	Repository root. First line: My name is Teta Erssie.
.gitignore, package.json, app.json, eas.json, tsconfig.json	Repository root
src/ and assets/	Application source and images
UI and UX PDF	docs/MOB_A2_2528255_UIUX.pdf
Test log	evidence/MOB_A2_2528255_TEST_LOG.pdf
This declaration	evidence/MOB_A2_2528255_DECLARATION.pdf
AI use	evidence/AI_USE.md

Release files (not committed)

GitHub release tag **v1.0.0** is expected to carry MOB_A2_2528255.apk and MOB_A2_2528255_DEMO.mp4. node_modules, caches, signing keys and the lecturer's brief are not part of the repository.

AI use, in short

Cursor was used to scaffold the Expo Router layout, draft reusable components, the profile editor, validation and AsyncStorage, draft the README, draft this declaration, the UI/UX PDF and the test log, and generate the illustrated avatar. I selected the personal content, the app name, the package name and the identity constants. The full note is evidence/AI_USE.md.

I understand that a missing APK, an APK that does not install, a missing identity, or an inaccessible GitHub link will not be repaired by the assessor.
